

1613 Polyester

Silicone Splicing Tape

Description

1613 is a polyester film coated with an orange translucent colour silicone pressure sensitive adhesive.

Applications

Splicing of various types of substrates, specially siliconized, like “silicone release papers” and films.

Product Benefits

- Excellent tack
- Withstands long periods of heat up to 150°C and shorter periods to 210°C.
- Orange colour enables easy splice identification

Technical Properties	Unit	Nominal value
Nominal Total Thickness	mm	0,100
Adhesive Thickness (silicone)	mm	0,077
Carrier Thickness (polyester)	mm	0,023
Tensile Strength	N/25mm	100
Heat Resistance	°C	210

Sizes	Rolls per box	Weight
50 mm wide,66 mt long	24	10 kg
75 mm wide,66 mt long	16	10 kg
